

Holt Integrated Circuits Providing Integrated COTS IC Solutions for MIL-STD-1553

The HI-6110 is a MIL-STD-1553B single message processor which can operate as a Remote Terminal, Bus Controller or Monitor Terminal. The device includes dual analog 1553 bus transceivers and handles all aspects of MIL-STD-1553B message processing including error checking and command word, status word and 32-word data storage. Its small size and flexibility makes the HI-6110 an ideal device for existing system upgrades, simplifying microprocessor or FPGA interfaces to the 1553 bus.

- *MIL-STD-1553B Protocol ICs*
- *3.3V Dual Transceivers – industry smallest*
- *Manchester Encoder / Decoders*
- *Interface Transformers (Single & Dual)*
